

AI ENABLEMENT, NOT ANOTHER CHATBOT

One AI enablement layer. Four product behaviours.

LoomAI supports conversational, event-driven and agentic products inside a governed, dealer-isolated deployment.

LOOMAI PRODUCT BEHAVIOURS

1 Conversational AI
User-led dialogue, grounded answers and governed actions.

2 Smart Brain
Events trigger fixed plans, task queues and durable analysis.

3 Multi-agent teams
A conversation manager coordinates specialist workers.

4 Sequential + parallel plans
Declarative workers run in order or concurrently.

Templates + plugins + policies -> one isolated dealer deployment

FROM INTENT TO ACTION

One journey, from a vague need to a qualified handoff.

The buyer can search naturally, understand the trade-offs and move forward without repeating the conversation.

1

Describe

Everyday needs, budget, journey and preferences

2

Discover

Semantic shortlist from this dealer's permitted stock

3

Compare

Consistent facts, evidence and visible trade-offs

4

Verify

Re-read current price, availability and key facts

5

Handoff

Customer-approved context plus a durable receipt

Demonstration inventory is fictional and clearly disclosed in the experience.

Customer surface

Docked chat for quick questions | Max workspace for search, comparison, sources and confirmed actions

loomai.pro/demos/dealership-ai

BEYOND CHAT

Transform the dealership website into an AI-enabled workspace.

The assistant carries context, evidence and governed tools through the customer's journey.

1 Persistent context

Conversation, selected vehicles and attached pages persist across navigation.

2 Adaptive tools

Browse stock or switch to vehicle-specific tools without losing either scope.

3 Visible evidence

Combine live provider facts, indexed stock, dealership documents and attachments.

4 Governed actions

Request a test drive, callback or handoff with confirmation and a durable receipt.

Dealer website

Shared context

AI workspace

Live facts + policy evidence

Customer-approved outcome

DATA FRESHNESS AND GROUNDED REASONING

Live data stays live. Indexed data stays useful.

LoomAI separates discovery evidence from operational truth, then revalidates important facts before a decision.

EXTEND AUTOTRADER'S PLATFORM WITHOUT COMPETING WITH IT.

Autotrader remains the data and automotive-product authority. LoomAI provides the governed AI experience and repeatable deployment layer.

AUTOTRADER BRINGS

Trusted automotive authority

- Authorised data and advertiser scope
- Connect capabilities and real-time contracts
- Marketplace reach and retailer relationships
- Deal Builder, Co-Driver and conversion journeys

LOOMAI BRINGS

Governed AI enablement

- Dealer-isolated deployments and lifecycle
- Grounded reasoning across stock and policy
- Governed actions, confirmations and receipts
- Reusable templates, plugins and UI surfaces

JOINT OUTCOME

Better-qualified buyers

- Relevant dealer-only shortlists
- Fewer stale or unsupported answers
- Consented context into the next journey
- Measurable conversion and trust evidence

FLEXIBILITY WITHOUT ONE-OFF BUILDS

One reusable dealership template

Plugins compile only granted capabilities

Approved model, vector and storage choices

Embed script or native host integration

Deployment-local traffic and secrets

Not proposing: a new marketplace, a data-resale layer, a replacement for Deal Builder, or another generic chatbot.

START WITH ONE BOUNDED, MEASURABLE PILOT.

A read-first Connect pilot can prove usefulness, freshness, isolation and conversion value before any broader rollout.

PILOT SCOPE

**One dealer. One advertiser.
One isolated deployment.**

- Read-first stock discovery and comparison
- Dealer-owned policy knowledge
- Live validation of selected facts
- One confirmed callback, test-drive or agreed handoff
- No provider write unless explicitly granted

WHAT WE NEED FROM AUTOTRADER

- Named product sponsor and Connect Integration Manager
- Sandbox credentials, capability grants, test advertiser and representative stock
- Written rights for retention, embeddings, inference, display and attribution
- Notification registration, retries and test-event path
- Preferred Deal Builder, enquiry, CRM or appointment handoff
- Go-live checklist and one candidate design-partner dealer

SUCCESS GATES

- Useful-result rate
- Shortlist and comparison completion
- Fact-support and freshness
- Qualified handoff rate
- Zero cross-dealer access
- Deletion and rollback proof
